

# Christian Rhodes

Front-End Developer / Software Developer

## SUMMARY

I am a junior front-end developer who loves building and maintaining modern, intuitive, and frictionless web applications and services. Web development allows me to think and work creatively and technically. I am used to agile software development and feel comfortable working on individual tasks in a team-setting. I am a fast learner and efficient communicator who loves learning new concepts and software tools.

## PROFESSIONAL EXPERIENCE

### Front-End Developer

for Dappd, a Web3 SaaS Startup company

Dec 2022 - Current

Remote, Burlington, VT

- Create responsive website based off client designs (Figma) using technologies such as React, Next.js, Typescript, and Tailwind CSS
- Communicate with clients to adjust any designs or web content
- Analyze and maintain new builds on a Kubernetes system
- Backend connections via Hasura middleware to connect GraphQL API to Postgres database

### College of Engineering and Mathematical Science (CEMS) Mentor @ University of Vermont

Aug - Dec 2022 at The University of Vermont

Burlington, VT

- Mentored a group of 12 CEMS students for their first semester

### Instructor

iD Tech

May 2022 - August 2022

Amherst, MA

- Taught courses including Game Design and Development with Unreal Engine, VR Game Development with Unity, and assisted with JavaScript and Python programming classes
- Collaborated with other instructors to teach material, solve scheduling and technical problems, and communicate efficiently

## EDUCATION
